Maritime E-Learning

Next Wave Learning promotes a focus on food safety training. Ensure you have the skills to maintain a safe food services environment on a vessel to protect passengers and crew.

ONLINE TRAINING

Food Safety Starts with Us
By working together in a supportive proactive environment, we make food safety a natural part of our culture – not just a system to follow.

Stay on course—whether you're offshore or online, our maritime training works wherever you are, with seamless access both offline and online.

Our team can assist with the development of personalized e-learning courses, so you can select the exact course material of interest or relevance to your operation.

Food safety onboard a vessel is everyone's responsibility.
