

# ZennPH: THE FUTURE OF CRUISE SHIP PUBLIC HEALTH

Cruise ships are floating cities, carrying thousands across the oceans, but outdated paper systems slow down procedures, create errors, and risk costly oversights. **ZennPH is the world's first fully digital ecosystem built exclusively for cruise ship public health.**

Founded by **Milos Obradovic**, who served across multiple cruise lines as a Public Health Officer and supported by industry expert, **Gus Skinner**. ZennPH transforms inspections, logbooks, and compliance into a seamless, paperless process that's fast, transparent, and impossible to overlook.

- **100% Digital Compliance**

Secure, instant, and inspection-ready

- **Time & Cost Savings**

Less paperwork, more focus on safety

- **Error-Proof Tracking**

No missed items or lost records

- **Sustainable by Design**

Replace thousands of paper logs, reduce waste and saves trees

Built for the realities of life at sea — reliable offline, simple to use by officers and crew, and scalable to accommodate the needs of your fleet. **ZennPH sets a new industry standard for health, safety, and sustainability.**
